Education

Indian Institute of Information Technology, Bhagalpur

B.Tech in Mechatronics and Automation Engineering

CGPA: 8.68/10

(2023 - 2027)

Experience

Itjobxs – Software Engineering Intern

January 2026 – June 2026

- Contributed to the **design and development** of a fully responsive web page for a dedicated section of **itjobxs.com**, focusing on user experience and responsive design.
- Worked on user **verification and authentication**, addressing engineering challenges related to detecting and removing **fake bots and spam posts**, helping improve platform security and reduce spam registrations by 15%.
- Developed an end-to-end **MERN E-Commerce website** for an ITJOBXS client, improving product and order management efficiency by approximately 20% through REST APIs, authentication, and CRUD operations.

Projects

API Abuse Detection Platform | *Node.js, Express.js, React, Redis, Apache Kafka, Prisma, SQL, Docker*  

- Built a **microservices-based** API Abuse Detection Platform using Node.js, Express.js, React, Redis, Apache Kafka, Prisma, SQL, and Docker to monitor API traffic, **optimize high-volume request handling**, and detect abnormal behavior.
- Implemented JWT authentication, **Redis-based rate limiting**, behavioral risk scoring, request tracking, and temporary IP/entity blocking to mitigate API abuse, excessive requests, and suspicious activity.
- Developed a security analytics dashboard with request metrics, failed-login tracking, suspicious entities, blocked IPs, risk evaluations, and **Kafka-based security events** for monitoring and incident analysis.

PrimeBid | *HTML, CSS, JavaScript, React.js, Express.js, Node.js, MongoDB*  

- Developed a full-stack auction platform with **5+ core modules** including auctions, bidding, leaderboards, commission management, and automated auction lifecycle handling.
- Implemented the platform using React.js, Redux, Node.js, Express.js, MongoDB Atlas, JWT, Bcrypt, REST APIs, with **server-side bid validation and automated cron jobs** for auction completion and commission verification.
- Addressed unorganized peer-to-peer selling in college hostels by replacing **WhatsApp negotiations** with a structured auction system, enabling multiple buyers to bid transparently and automating winner selection and auction completion.

Technical Skills and Interests

Languages: C, C++, JavaScript, TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Microservices

Databases: MongoDB, SQL, Prisma, PostgreSQL

Caching & Messaging: Redis, Apache Kafka

Developer Tools: Git, GitHub, Docker, Linux, Monaco Editor, Postman, Render, Vercel, Netlify

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Achievements

- Secured **35th Rank** among 2500+ participants in the Arena [Code2Career](#) Coding Round organized by Let's Code Community.
- Successfully earned [CSA \(Certified System Administrator\)](#) and [CAD \(Certified Application Developer\)](#) certification, showcasing expertise in Servicenow platform development and administration.
- Qualified **GATE (CS) 2026**, Qualified GATE (CS) 2026, demonstrating strong aptitude and proficiency in core Computer Science concepts.
- Secured **14th rank** out of 50 teams in Internal Hackathon for [SIH-2023](#).
- Solved **250+ DSA** problems on platforms like [LeetCode](#) and [CodeChef](#), strengthening problem-solving and algorithmic thinking.
